# Forward-Looking Statements

During the course of this presentation, we may make forward-looking statements regarding future events or the expected performance of the company. We caution you that such statements reflect our current expectations and estimates based on factors currently known to us and that actual events or results could differ materially. For important factors that may cause actual results to differ from those contained in our forward-looking statements, please review our filings with the SEC.

The forward-looking statements made in this presentation are being made as of the time and date of its live presentation. If reviewed after its live presentation, this presentation may not contain current or accurate information. We do not assume any obligation to update any forward looking statements we may make. In addition, any information about our roadmap outlines our general product direction and is subject to change at any time without notice. It is for informational purposes only and shall not be incorporated into any contract or other commitment. Splunk undertakes no obligation either to develop the features or functionality described or to include any such feature or functionality in a future release.

## Why?

- ▶ Cross Channel Searches became complicated very quickly
- ▶ Inconsistent enrichment across channels
- ▶ Cross channel field names inconsistencies
- ▶ Search performance optimization
- ▶ Investigation streamlining
- ▶ Performance issues on complex dashboards

# Key Takeaways

This is where the  
subtitle goes

1. Understand your own data, focus on use cases
2. It must be actionable. Careful data onboarding
3. Consider the need for Splunk professional service while building required skill sets internally
