

## .conf21 Security Product Captions

### Splunk SOAR App Editor

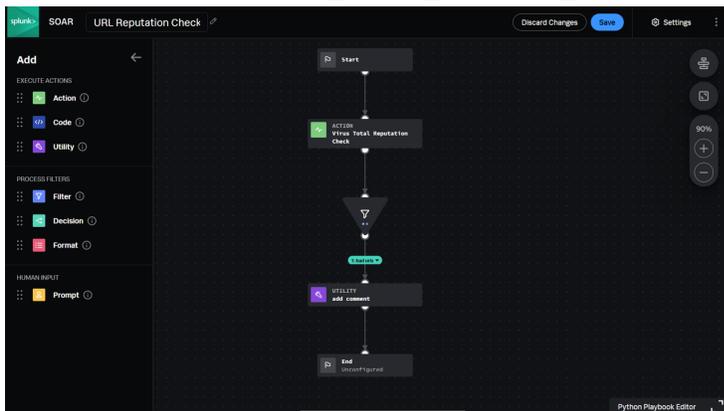

Screenshot name: Splunk\_SOAR\_App\_Editor.png

Caption: In Splunk SOAR's App Editor, you can easily view and add code, test actions, see log results and troubleshoot — plus, gain additional visibility into how well your app is working and change it to suit your needs.

### Splunk SOAR Visual Playbook Editor

Screenshot name: SOAR\_Visual\_Playbook\_Editor.png

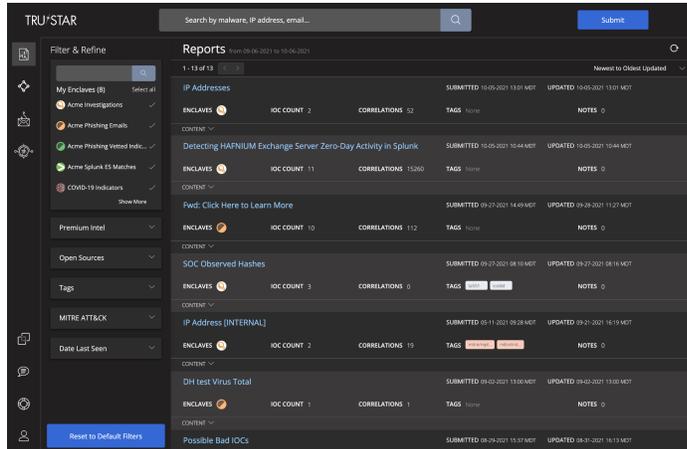

Caption: Splunk SOAR's updated, modern visual playbook editor makes it easier than ever to create, edit, implement and scale automated playbooks to help your team achieve faster time to value with security automation, and ultimately, respond to security incidents faster.

## Splunk Intelligence Management (TruSTAR)

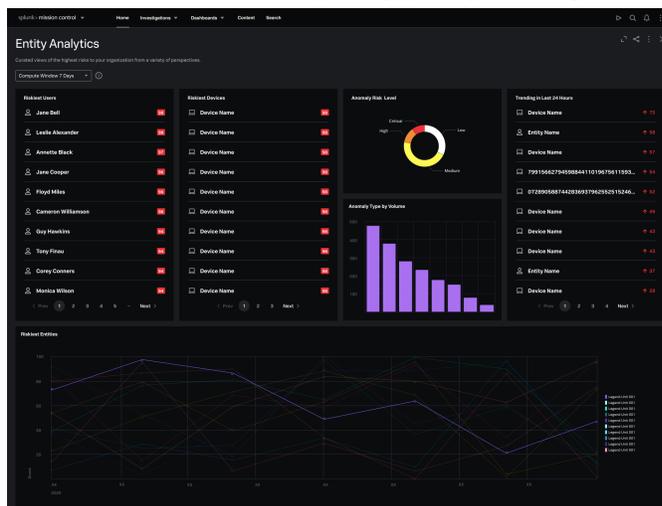

Screenshot name: Splunk\_Intelligence\_Management\_TruSTAR Product Screenshot.png

Caption: Splunk Intelligence Management enables security teams to operationalize internal and external security intelligence across their ecosystem of teams, tools and partners, and directly delivers insights into Splunk Enterprise Security and Splunk SOAR.

## Behavioral Analytics for Security Cloud

Screenshot Name: SBA\_entity\_analytics.png

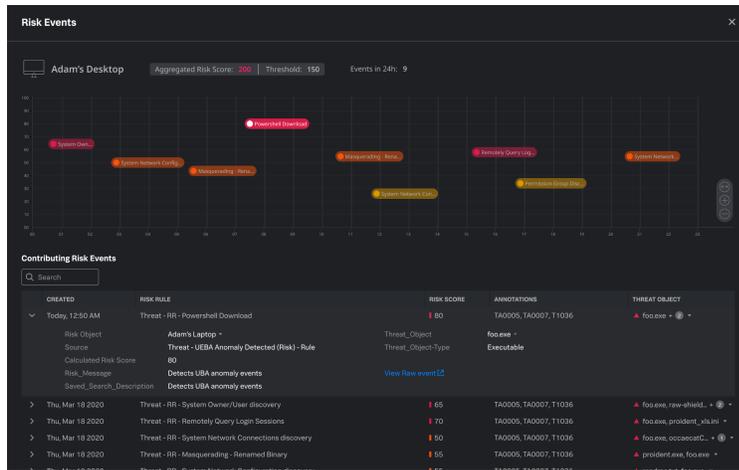

Caption: Curated views of the highest entity related risks to your organization from a variety of perspectives.

## Risk-Based Alerting in Enterprise Security Cloud

Screenshot Name: Security\_Cloud\_Risk Events\_dark mode\_screenshot.jpeg

Caption: Risk-Based Alerting (RBA) in Enterprise Security Cloud aligns alerts to business risk and connects alerts together to show the pattern of an attack over time.
