

### .conf21 Observability Product Captions

#### AlwaysOn Profiling for Splunk APM

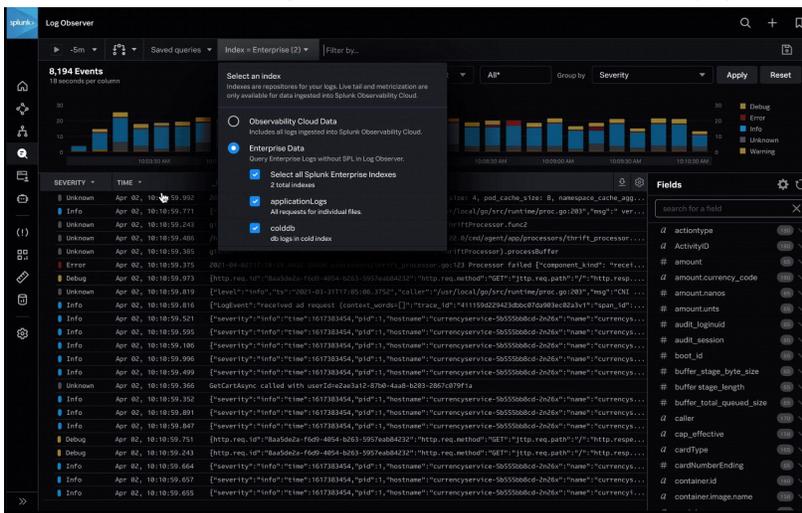

Screenshot Name: AlwaysOn\_Profiling\_Splunk\_APM.png

Caption: Splunk APM now includes AlwaysOn Profiling, providing application developers and service owners code-level visibility and analysis so they can troubleshoot production issues faster.

#### Splunk Log Observer and Splunk Enterprise Integration

Screenshot Name: Log\_Observer\_Splunk\_Enterprise.jpg

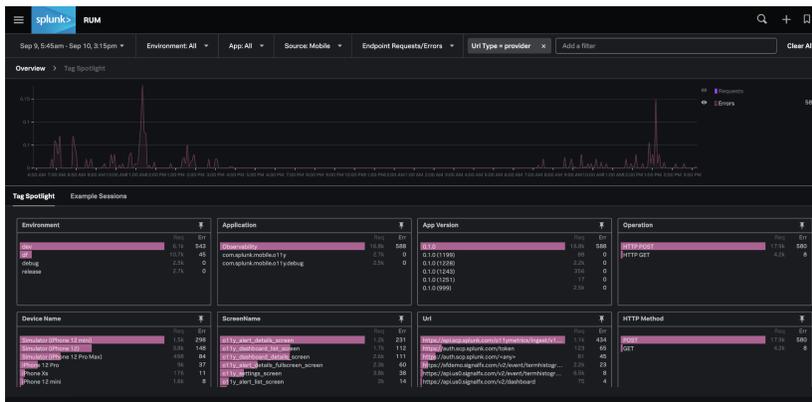

Caption: With the new integration between Splunk Log Observer and Splunk Enterprise, IT and DevOps teams can leverage Log Observer's intuitive interface to explore and troubleshoot any logs in the Splunk platform, even those they're already sending to Splunk Enterprise.

## Splunk RUM for Mobile Applications

Screenshot Name: Splunk\_RUM\_Mobile\_Applications.png

Caption: Splunk RUM for Mobile Applications now extends monitoring beyond web browsers and into native mobile applications, helping improve performance and isolate customer facing issues on iOS and Android.

## Splunk Observability Cloud for Mobile

Screenshot Name: Splunk\_Observability\_Cloud\_Mobile.png

Caption: Splunk Observability Cloud for Mobile is a companion app to the Splunk Observability Cloud platform that extends users' capabilities beyond the desktop, allowing teams to quickly view, respond to and triage incidents right from their mobile devices.
