

.conf22 Las Vegas COVID-19 Rider

Safety

Your safety and the safety of all attendees is of the utmost importance to Splunk. By registering for .conf22, you agree to any and all COVID-19 safety procedures that Splunk employs at the conference. Upon check-in at the event in Las Vegas, you will be asked to re-confirm that you will abide by those policies as a pre-condition to receiving your .conf22 badge. Current Splunk policies require that all .conf22 Las Vegas attendees be fully vaccinated as defined by the CDC; and must provide proof of vaccination status onsite in order to be admitted and pick up a badge for entry. Proof may include a visual check of an original vaccination record or an uploaded version of your vaccination record entered into our CLEAR app.

Additional protocols could, by way of example, require that attendees:

- Socially distance in session rooms and meal areas
- Wear appropriate face coverings
- Follow directed walking traffic
- Recognize and respect your fellow attendees' proximity comfort
- Alert Splunk organizers should you be exposed to COVID-19 within the event time period
- Leave the event space if you exhibit any COVID-19 symptoms

Splunk's safety considerations may be more rigorous than Clark County's at the time of the event and you agree that you will abide by the event guidelines.

Awareness

COVID-19 has been declared a worldwide pandemic by the World Health Organization, is extremely contagious and is spread mainly from person-to-person contact. People can be infected and show no symptoms and therefore spread the disease. COVID-19 can cause serious and potentially life-threatening illnesses and even death. As a result, federal, state, and local governments and federal and state health agencies recommend wearing masks and social distancing and have, in many locations, prohibited the congregation of larger groups of people.

Please note that it is not possible to completely prevent the potential presence of COVID-19. Consequently, Splunk cannot prevent you from becoming exposed to, contracting, or spreading COVID-19 while traveling to or attending .conf. Therefore, if you choose to attend .conf, you may be exposing yourself to and/or increasing your risk of contracting or spreading COVID-19.

Cancellations

Splunk allows for transfer of your .conf22 passes to another unregistered individual within your company if you are unable to attend .conf22 in Las Vegas. Should the United States and Nevada face another pandemic wave that greatly restricts travel and/or large scale gatherings, Splunk will offer refund or credit options to those who have already paid for their passes in full via credit card, PO, or wire transfer.

International Travel

As is the case every year, we extend invitations to our non-U.S. customers, partners, and Splunkers. However, the restrictions and guidelines regarding international travel are regularly changing, so please be aware of your resident nation's re-entry restrictions as well as the United States' visa, vaccination, or negative COVID-19 test requirements for initial entry. Splunk is not

responsible for any quarantine lodging, testing fees, vaccination fees, or other considerations that may be necessary for you to join us on site in Las Vegas.
