

Next Generation Dashboards

Stephen Luedtke | Sr. Technical Marketing Manager

September 27, 2017 | Washington, DC

Forward-Looking Statements

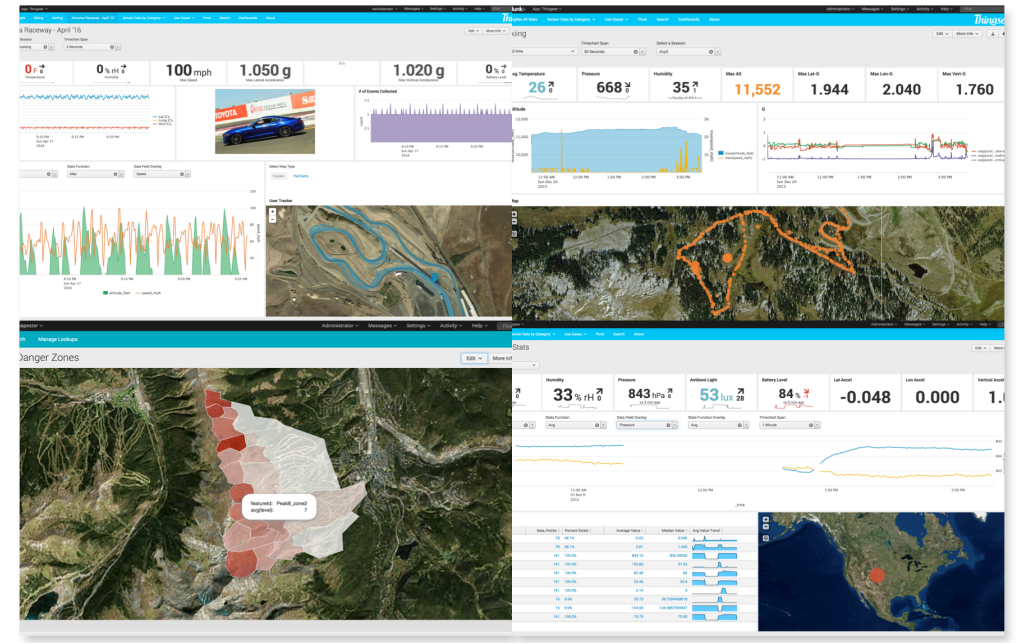

During the course of this presentation, we may make forward-looking statements regarding future events or the expected performance of the company. We caution you that such statements reflect our current expectations and estimates based on factors currently known to us and that actual events or results could differ materially. For important factors that may cause actual results to differ from those contained in our forward-looking statements, please review our filings with the SEC.

The forward-looking statements made in this presentation are being made as of the time and date of its live presentation. If reviewed after its live presentation, this presentation may not contain current or accurate information. We do not assume any obligation to update any forward looking statements we may make. In addition, any information about our roadmap outlines our general product direction and is subject to change at any time without notice. It is for informational purposes only and shall not be incorporated into any contract or other commitment. Splunk undertakes no obligation either to develop the features or functionality described or to include any such feature or functionality in a future release.

Putting It All Together

Custom Visualizations

Native Visualizations In Splunk

► Native charts and maps

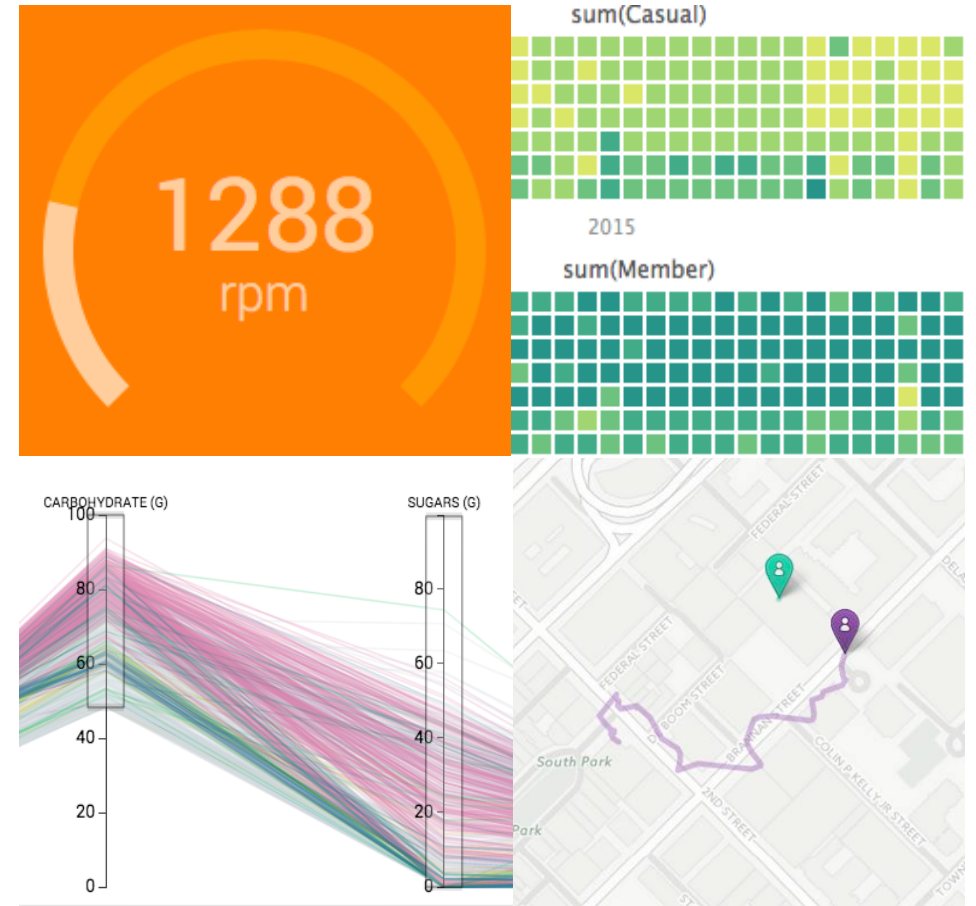

- Bar / Line / Area charts
- Bubble / Scatter plots
- Gauges
- Maps
- Single Value Displays
- Tables

► Generalized to fit use cases across many different areas

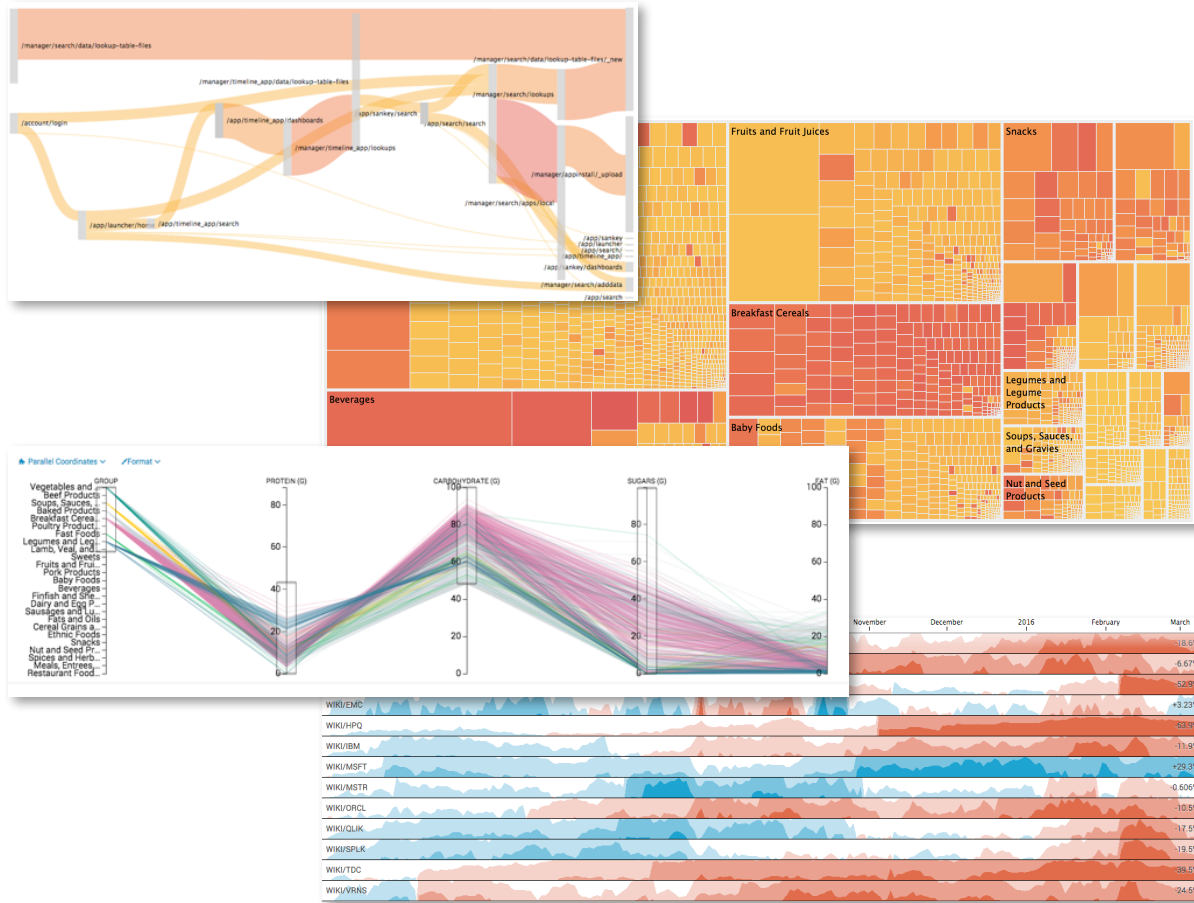

► Can be customized to some extent to cover specific use cases

Custom Visualizations FTW!

- ▶ Many use cases require a more specific visualization
- ▶ Specific custom appearance
- ▶ Represent data where native visualizations are not suitable
 - You can Splunk everything!
 - We won't be able to predict every possible use case
 - **Still uses SPL to drive visualizations**

Custom Visualizations

- ▶ Platform **extensibility** framework and API
- ▶ Targeted at internal and external **developers** with web development / JS skills and basic knowledge of the Splunk platform
- ▶ Developers can make use of any third party libraries (d3.js, three.js, highcharts.js, etc...) that run in the browser*

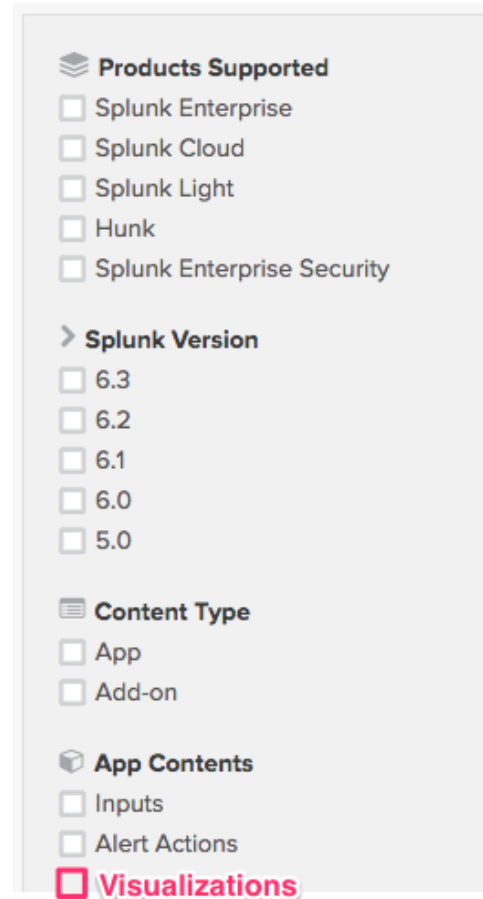

* with minor adjustments, and if third party license permits such use

Custom Visualizations For Admins

- ▶ **Packaged as an app!**
- ▶ Installed like any other app
- ▶ Users can search for visualizations on Splunkbase and directly in the product

Custom Visualizations How-to

- ▶ Choose from potentially dozens of installed visualizations!
- ▶ Appears as a first-class citizen alongside native visualizations
 - Looks and works just like packaged native visualizations
- ▶ Customize functionality and appearance of the visualization without touching any code, straight from the UI
- ▶ **SPL Example provided as you hover over each visualization option**
