

Forward-looking statements

This presentation may contain forward-looking statements that are subject to the safe harbors created under the Securities Act of 1933, as amended, and the Securities Exchange Act of 1934, as amended. All statements other than statements of historical facts are statements that could be deemed forward-looking statements. These statements are based on current expectations, estimates, forecasts, and projections about the industries in which we operate and the beliefs and assumptions of our management based on the information currently available to us. Words such as “expects,” “anticipates,” “targets,” “goals,” “projects,” “intends,” “plans,” “believes,” “momentum,” “seeks,” “estimates,” “continues,” “endeavors,” “strives,” “may,” variations of such words, and similar expressions are intended to identify such forward-looking statements. In addition, any statements that refer to (1) our goals, commitments, and programs; (2) our business plans, initiatives, and objectives; and (3) our assumptions and expectations, including our expectations regarding our financial performance, products, technology, strategy, customers, markets, acquisitions and investments are forward-looking statements. These forward-looking statements are not guarantees of future performance and involve significant risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from results, performance or achievements expressed or implied by the forward-looking statements contained in this presentation. Readers are cautioned that these forward-looking statements are only predictions and are subject to risks, uncertainties, and assumptions that are difficult to predict, including those identified in the “Risk Factors” section of Cisco’s most recent report on Form 10-Q filed on May 21, 2024 and its most recent report on Form 10-K filed on September 7, 2023. The forward-looking statements made in this presentation are made as of the time and date of this presentation. If reviewed after the initial presentation, even if made available by Cisco or Splunk, on Cisco or Splunk’s website or otherwise, it may not contain current or accurate information. Cisco and Splunk undertake no obligation to revise or update any forward-looking statements for any reason, except as required by law.

In addition, any information about new products, features, functionality or our roadmap outlines our general product direction and is subject to change at any time without notice. It is for informational purposes only and shall not be incorporated into any contract or other commitment or be relied upon in making a purchasing decision. We undertake no commitment, promise or obligation either to develop the features or functionalities described, in beta or in preview (used interchangeably), or to include any such feature or functionality in a future release. The development, release, and timing of any features or functionality described for our products remains at our sole discretion.

Cybersecurity Landscape

Unique Challenges and Risks

Data silos and fragmentation

Complex data analysis and management

Slow threat detection and response

Compliance and reporting difficulties

Inefficient resource utilization

Modernizing Cybersecurity

What can we do?

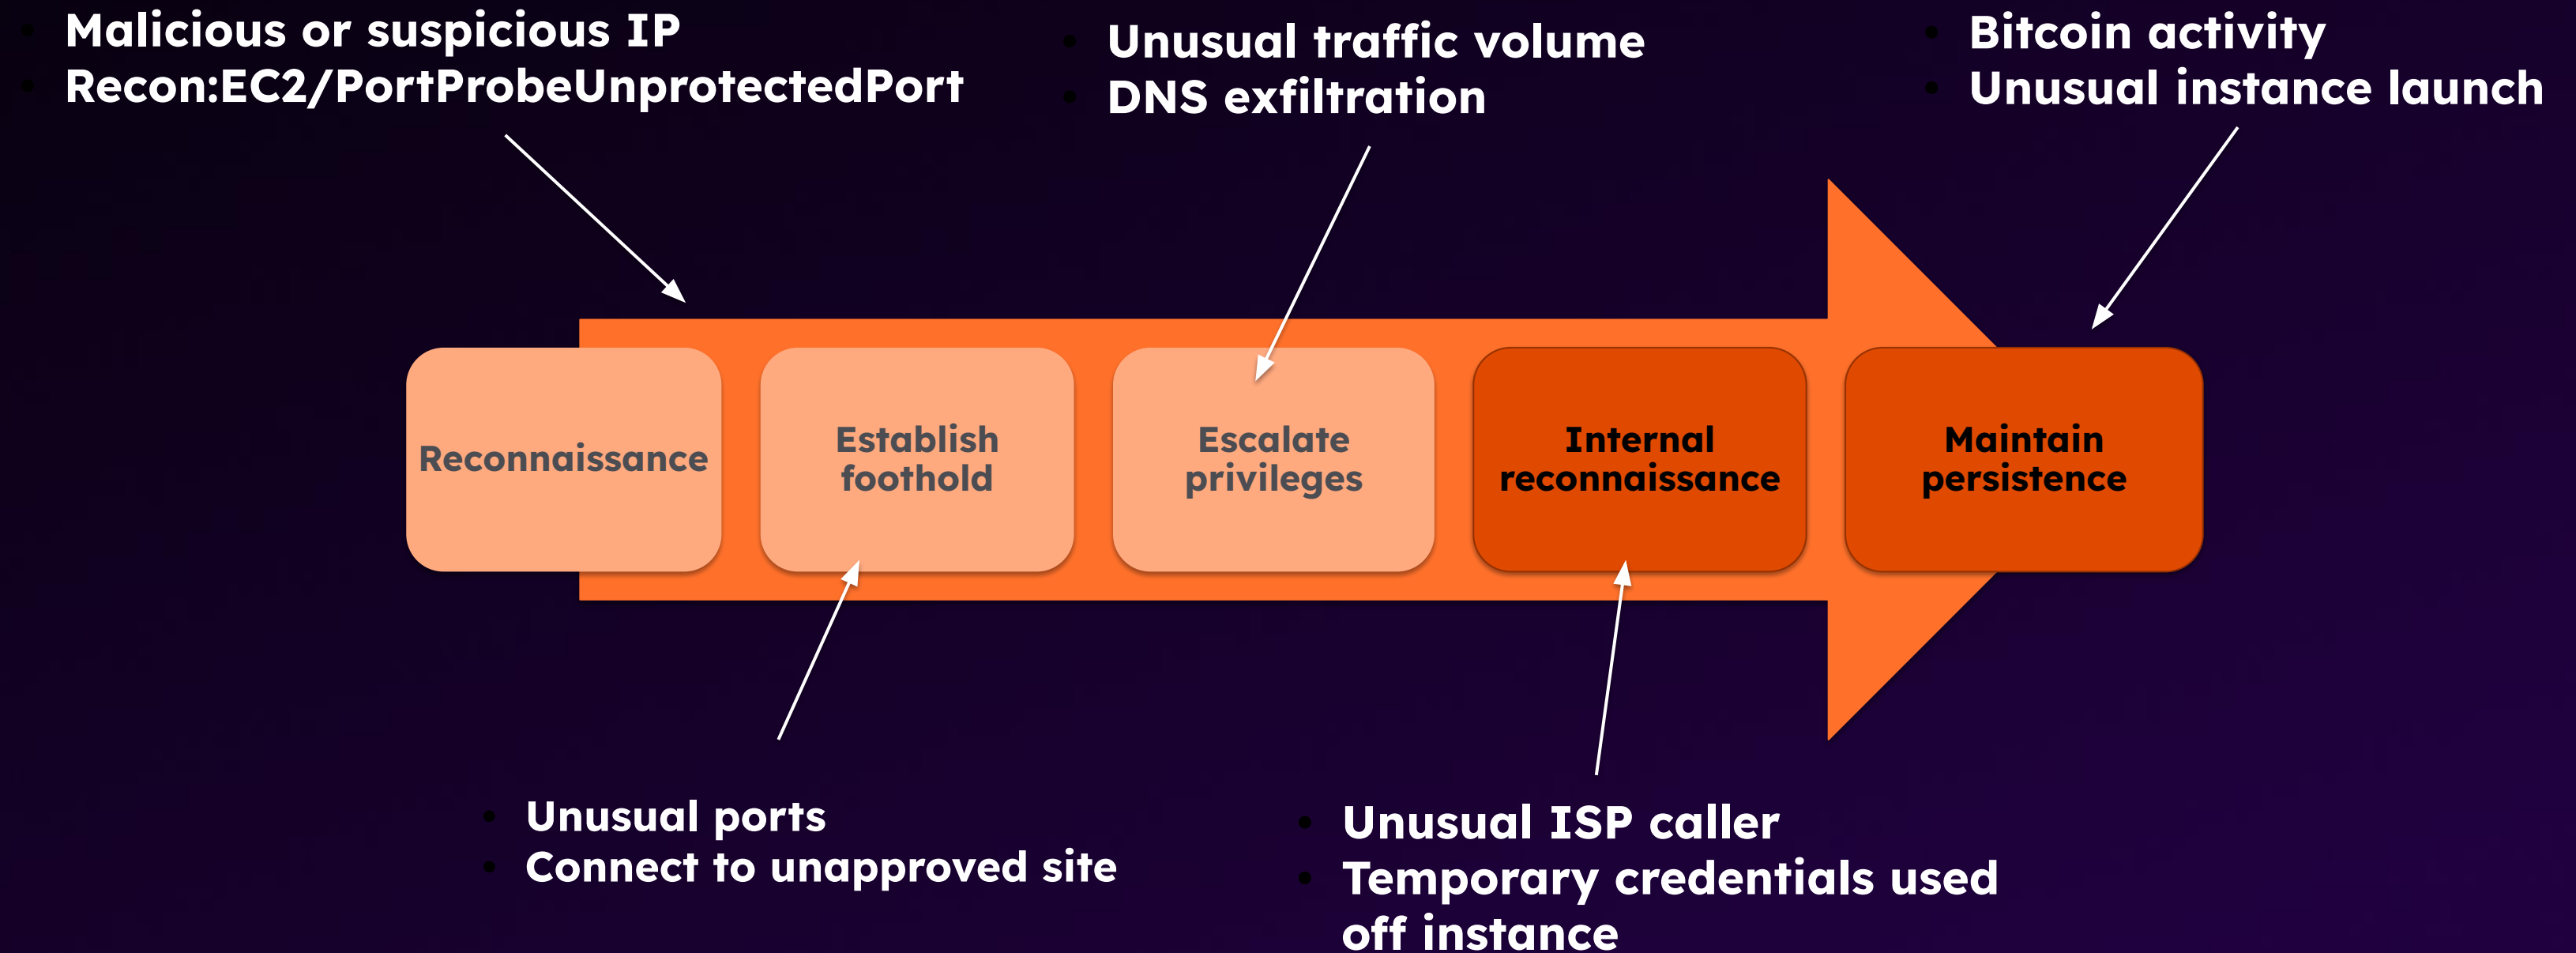

A black and white photograph of a man and a woman in a server room. The man is pointing at a laptop screen while the woman looks on. Overlaid on the image are several colorful geometric shapes: a pink parallelogram, an orange parallelogram, and a pink line graph with four vertical bars of increasing height. The background shows server racks with various cables and equipment.

Defining Organization's Security Posture

A **robust** security posture is characterized by its ability to **anticipate** and **mitigate** risks before they materialize into actual threats.

- **Identify** sensitive and critical data.
Prioritize security of data.
- **Adopt security best practices** (NIST CSF) and **Zero Trust architecture**.
- **Accelerate** towards secure **cloud services**.
- **Centralize** security data and analysis.
- **Invest** in technology and personnel.

Understanding Threat Actor Lifecycle

Strengthening Security Posture with AI-Enabled Insights from Amazon[®] Security Lake, Splunk[®] and Recorded Future[®]

How we can help.

Transforming Challenges into Opportunities

Three major components are required.

1. Scalable data storage and management – Amazon Security Lake (**Integrated**).
2. Real-time analytics – Splunk (**Collaborative**).
3. Advanced threat intelligence – Recorded Future (**Decision Ready**).

Solution Overview

Navigating the future of cybersecurity

Amazon Security Lake

- Data aggregation into your account, with variety of supported log and event sources.
- Multi-account and multi-region data management, compliance, and security.
- Data transformation and normalization into Open Cybersecurity Schema Framework (OCSF) and Apache Parquet Format.
- Seamless integration with analytic tools.

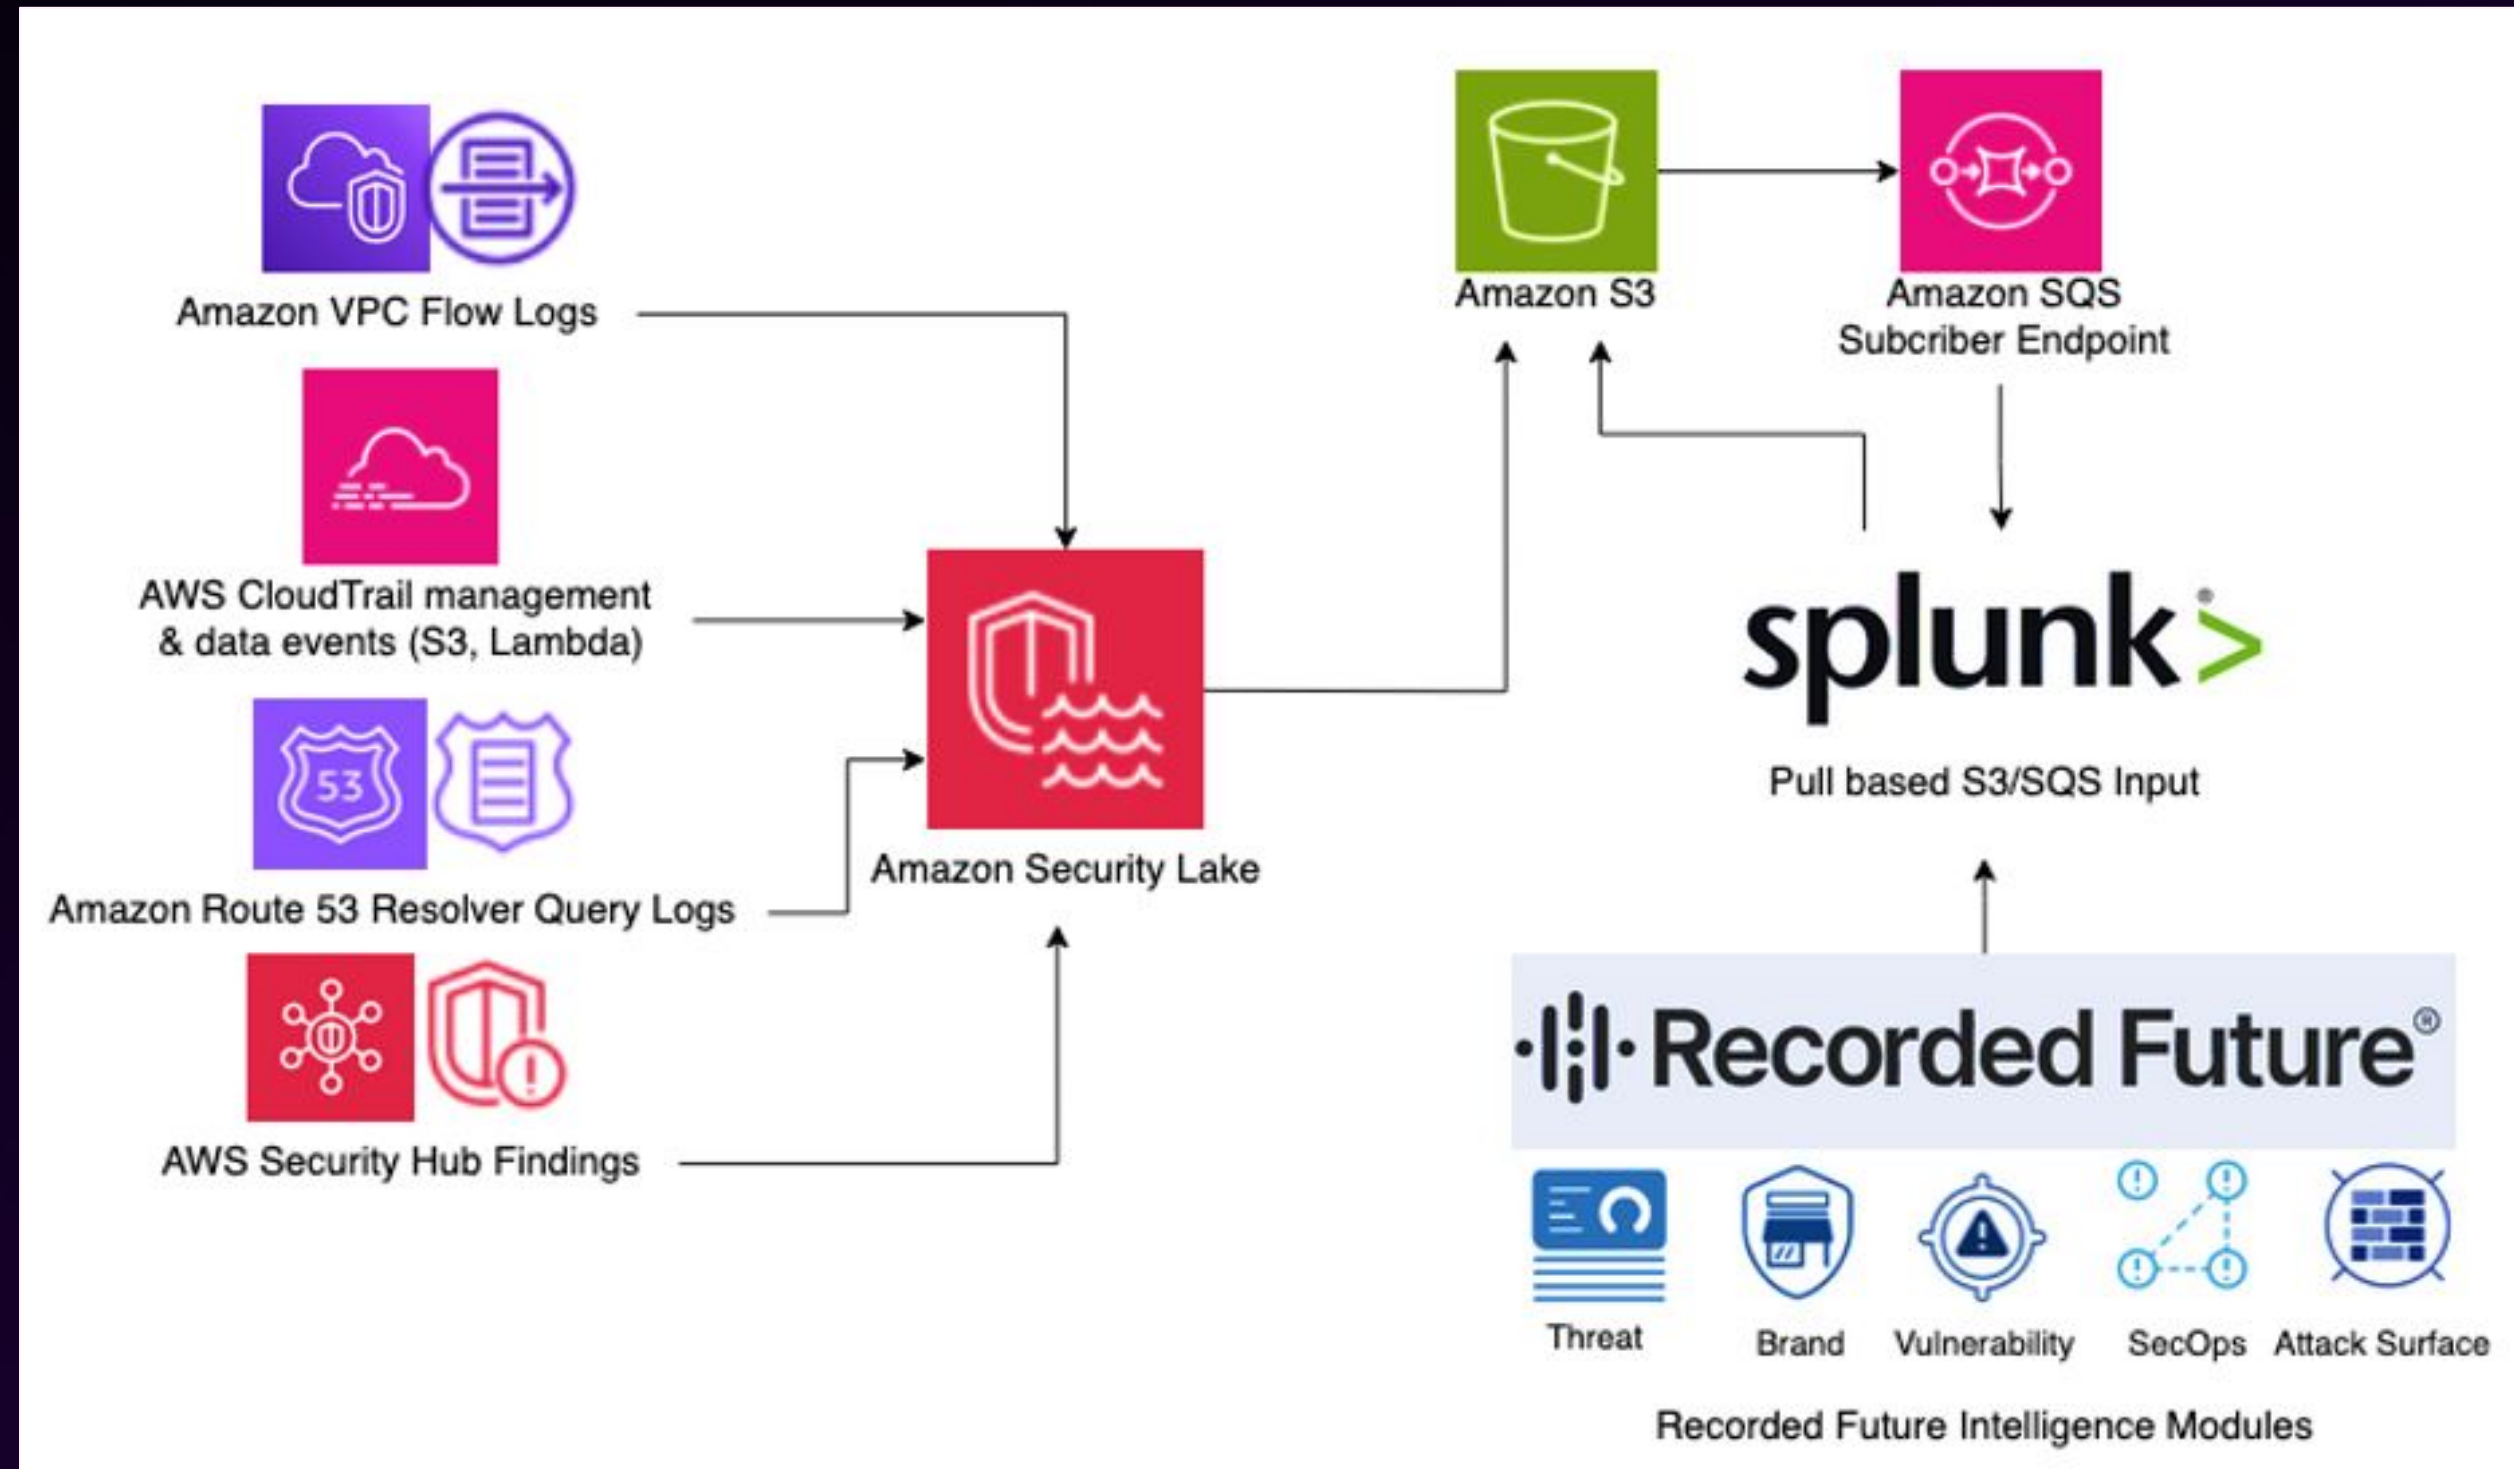

Splunk

- Real-time data analysis and monitoring.
- Advanced machine learning capabilities.
- Customizable dashboards for actionable insights.
- Scalable architecture for enterprise data.

Recorded Future

- Proactive threat intelligence provision.
- Real-time risk scoring and analysis.
- Enriches data with contextual information.
- Supports predictive security measures.

Reference Architecture

Fortifying the Cybersecurity Landscape

Integrating Amazon Security Lake, Splunk and Recorded Future can offer key use cases and benefits

- Enhance cybersecurity postures
- Streamline operations
- Improve threat intelligence

Call to Action

How to get started?

- Check out our latest AWS Partner Network (APN) Blog on this [joint solution](#) to enhance enterprise resilience. **Scan the QR code.** 🖱️
- Fill out the [Contact us](#) form in the blog to help you get started.
- Stop by AWS booth at .conf to discuss more.

Thank you

Work hard. Have fun. Make history.
